Professional Summary

Detail-oriented MCA student with strong focus on **UI/UX design and web development**. Experienced in designing user-centric interfaces using Figma and translating designs into responsive HTML and CSS layouts. Skilled in usability principles, wireframing, and prototyping. Seeking an entry-level role in **UI/UX Design or Web Development**.

Technical Skills

Languages: Python, Core Java, SQL

Web & UI/UX: HTML5, CSS3, Bootstrap, Responsive Web Design, UI/UX Design, Wireframing, Prototyping, Usability Principles

Databases: MySQL, SQLite

Tools: Git, GitHub, VS Code, Figma, MS Excel, MS Office

Concepts: OOP, DBMS, Operating Systems, Data Structures

Projects

Eco Trekkers — Trekking App (UI/UX Focused Project)

In Progress

- Designing UI/UX for an eco-friendly trekking and travel discovery application.
- Created **wireframes and high-fidelity screens** for trek exploration and packages using Figma.
- Implementing designs into **responsive web UI** using HTML and CSS.

Gusto — Delivery App (UI/UX Design Project)

Completed

- Designed end-to-end **UI/UX** for a food delivery application using **Figma**.
- Created **wireframes, user flows, and interactive prototypes** for home, listings, cart, checkout, and order tracking.
- Focused on **usability, visual hierarchy, and clean navigation**.
- Converted selected designs into **responsive HTML and CSS** layouts.

Khan Mahal — E-Commerce Website

Completed

- Developed and managed an e-commerce website for Kashmiri dry fruits and export-quality products.
- Implemented **responsive layouts and brand-focused UI** using HTML, CSS, JavaScript, and Bootstrap.

Weather Application (Python)

Completed

- Built a live weather application using the OpenWeather API with proper error handling.

Kashmiri Audio Box — Desktop Application

Completed

- Developed a Tkinter-based multimedia application with playlist and playback controls.
